VAZIFA

1. Har bir mezonga 10 ballik baho va 1–2 jumlali asos: birinchi taassurot, vizual ierarxiya, tipografiya, kontent va ishonchlilik, loyihalarni ko'rsatish, **mobil ko'rinish**, konversiya (yollash / bog'lanish).
2. 10/10 dan ajratib turgan eng muhim 10 ta muammo — ta'siri bo'yicha tartibda; har biriga aniq tuzatish (maket / CSS darajasida).
3. Faqat 3 ta narsani o'zgartirish mumkin bo'lsa — qaysilar?
4. Shu uslubdagi 2–3 ta haqiqiy portfolio namunasi va ulardan nimani olish kerak.

Umumiy maslahat emas, aniq takliflar. Rang va texnologiyani almashtirishni taklif qilma — mavjud uslub ichida yaxshila. Javob o'zbek tilida.
